General Observations

EXTERNAL

The vessel is bolted to the floor. There is no sign of corrosion or pitting externally. The vessel has been painted and there is no sign of leaks at any of the flanges or connections. The gauge glass and gauges appear to be functioning properly. The controls and pneumatic lines appear to be in good operating condition.

INTERNAL

There is limited access through ¾" opening. There is product residue on the shell and when removed then does not appear to be any corrosion or pitting.
